

**Mark S. Schuyler**

1930 W. San Marcos Blvd., Spc. 216

San Marcos, CA 92078-3965

Telephone: (760) 456-9489 / (760) 536-9562, e-mail: MarkSchuyler@herow.org, Skype: msschuyler44

**All reports and documents can be downloaded from [www.MarkSchuyler.weebly.com](http://www.MarkSchuyler.weebly.com) and additional information for Mark and the HEROW program can be viewed at [www.HEROW.org](http://www.HEROW.org).**

**Professional Objective:** Obtain a consulting, independent contractor, temporary or permanent position which will allow me to utilize my 30 years of extensive futures and commodity technical and fundamental analysis skills (*see my [list of purchased educational study materials referenced below](#)*), project management, engineering and reporting knowledge to be autonomous in following, creating, and managing technical Futures and Commodity trading projects/systems which produce a Perpetual Income Generating System (PIGS) resulting in continuous upward sloping Equity Curve(s) (*see [current attached recent Performance Reports from 20130816 for the PIGs system for both the IB \(start value = \\$63.4k\) and AMP \(start value = \\$30.0k\) futures accounts](#)*).

**EDUCATION:**

B.S., Engineering Management - University of Illinois at Chicago

B.S., Equivalent, Electrical Engineering - University of Illinois at Chicago

U.S. Marine Corps Training - Crypto/Teletype Technician

**Formal Engr. Career Courses:** University of Michigan – Establishing and Implementing the Product Safety Program; University of Michigan – Project Management; University of Michigan – Designing for EMC - Practical Tools and Techniques; UL – Key to International Compliance; UL – ISO14000/9000 Compliance;

**Extension Courses/Software:** MS-Project, -Excel, -Access, -Visio, -Office, Database Engineering, minor in ORCAD, AUTOCAD, JAVA/OO Programming Languages

**Educational Trade Related Courses/Software:** Wm. Grandmill, Fishback ODDS, numerous Chart Pattern courses, Equity options, Chuck Hughes, Indigo Equity systems, and greater than 150 Commodity / Futures / Options / Equities educational trading books and materials studied. (*see [Educational Information List below](#)*)

**Day-Trade Emini S&P 500-ES market**

**September 2004 - present**

**TradeStation Charts / InterActive Brokers Simulator – Accomplishments:**

- Current Emini (ES) PIG systems technical indicators created through the TradeStation Easy Language program code (*see [image of TS-Daily Indicators setup below](#)*).
- Designed, developed and tested more than 200 indicators for use in the Perpetual Income Generating System (PIGs get fat and Hogs get slaughtered), finalizing system as shown in attached indicators image.
- PIGs is a discretionary system that utilizes approximately 97% Limit orders to Enter/Exit all trades (*see [images of Daily Trades Reports to confirm Limit Order usage](#)*). All Interactive Broker orders can be reviewed in the documents attached – *see [pdf documents: 2013xxxx\\_FPIAT\\_TrackRecord\\_Trades](#)*.
- PIGs Trade setups controlled (turned on and off), by daily Economic news and Market Moving report releases.
- Trade management has affinity toward stronger Win/Loss Ratio and continuous positive Daily Profit Gain providing the PIGs with a proper sloped Equity Curve (Return On Investment) (*see [attached simulated PIGs Reports for the Track Records started on August 16, 2013 for both IB and AMP-Ninja Trader](#)*).
- Prefer Futures over Equities due to advantageous tax benefits of 60/40 LTCG and Annual Income Tax rates.
- Developed Daily Trade Report Management System for use in Track Record reporting updates which includes 9 specific charts (*see [the attached LTTRR.pdf](#)*).

**Study Fundamental to Technical Analysis**

**January 1982 – September 2004**

**Fundamental to Technical Analysis - Accomplishments/Duties/Functions:**

- 1982 – 1984: Introduced to Commodity trading with Hume – Super Investor Files – continuous study and interest to present day – see list of purchased investment educational materials.
- 1984 – 1986: With respect to Wm. Grandmill's fundamental data analysis approach; designed, developed, and implemented control systems for a Fundamental Supply and Demand distribution database utilizing fundamental analysis for markets containing seasonal fundamental data.
- 1984 – 1986: Developed Fundamental Data Analysis computer control log systems to determine high trade probabilities for use in markets having fundamental data including Grains, Meats, Softs, and Metals.

- 1986 – 1988: Active and successful trading of resultant Fundamental data analysis input to Seasonal Swing Trading System in Futures, Futures Options and Commodity markets.
- 1988 – 1993: Engineering Management position with General Dynamics and study period for Equities and Options investing systems.
- 1992 – 1993: Series 6 License obtained
- 1993 – 2004: Engineering Management position with Hitachi Home Electronics and investing Equities and Options through 401k; study period for Perpetual Income Generating System (PIGs).
- 2000 – 2002: Equity Portfolio management through Indigo software and Jack Carter systems.
- 2000 – 2004: Seasonal Technical/Fundamental Data System andstepping stone leading to the Perpetual Income Generating (PIG) System.

## Self Directed Day Trader Self-Employed

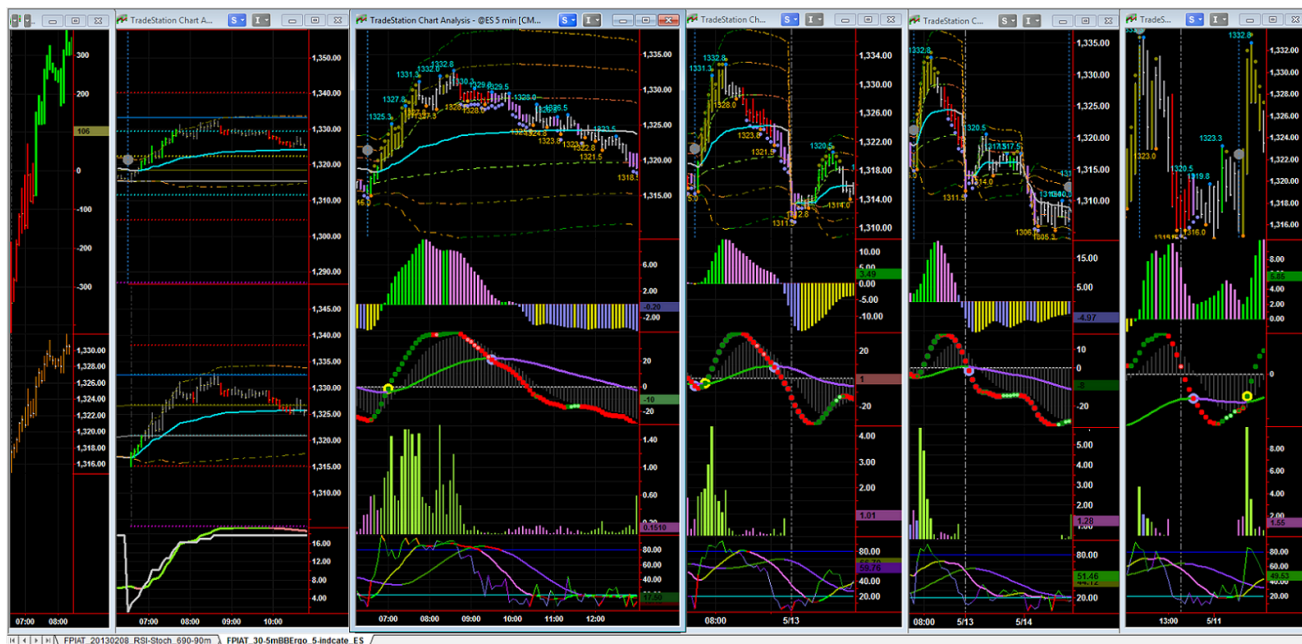

Oct. 2004 – Present

Utilized 30 years of financial study in an attempt to successfully build, test, and trade Equities and Commodity Futures day trading systems; including custom indicator code in the TradeStation Easy Language program and Object Oriented Class script. I wanted an occupation that could be worked at in perpetuity, utilizing my affinity with technology and keeping my skills acute, while consistently adding to my personal bottom line with a daily, perpetual, income generating system. Technological advances have finally allowed individuals to participate in this arena, and I made an attempt to turn my long time study of the futures markets and passion for investing into a reality.

### Why Simulation?

Due to an untimely amicable dissolution of my 37 year marriage, and yes, it's all good between us and we are much better friends now, and followed almost immediately by my, now, ex-wife contracting Leukemia cancer, and now on her fourth round of chemo and radiation treatments leading to a bone marrow transplant and a very lengthy recovery period. I could not leave her to battle this health crisis alone, and the battle against the cancer has extensively depleted both of our financial funds. Because I love to trade, and I am very good at reading my custom indicators and producing a very promising perpetual income, I can only run simulations with limit orders to prove the value of the PIG system at this current time. Secondary proof of the PIGs value and strength can be viewed in the newly started, \$30k initial funding capital, simulation account started on August 16, 2013 ([see recent NinjaTrader Performance Reports from 20130816](#)).

### Perpetual Income Generating system (PIGs) – Short Term Daily “Bread and Butter” TradeStation Indicators

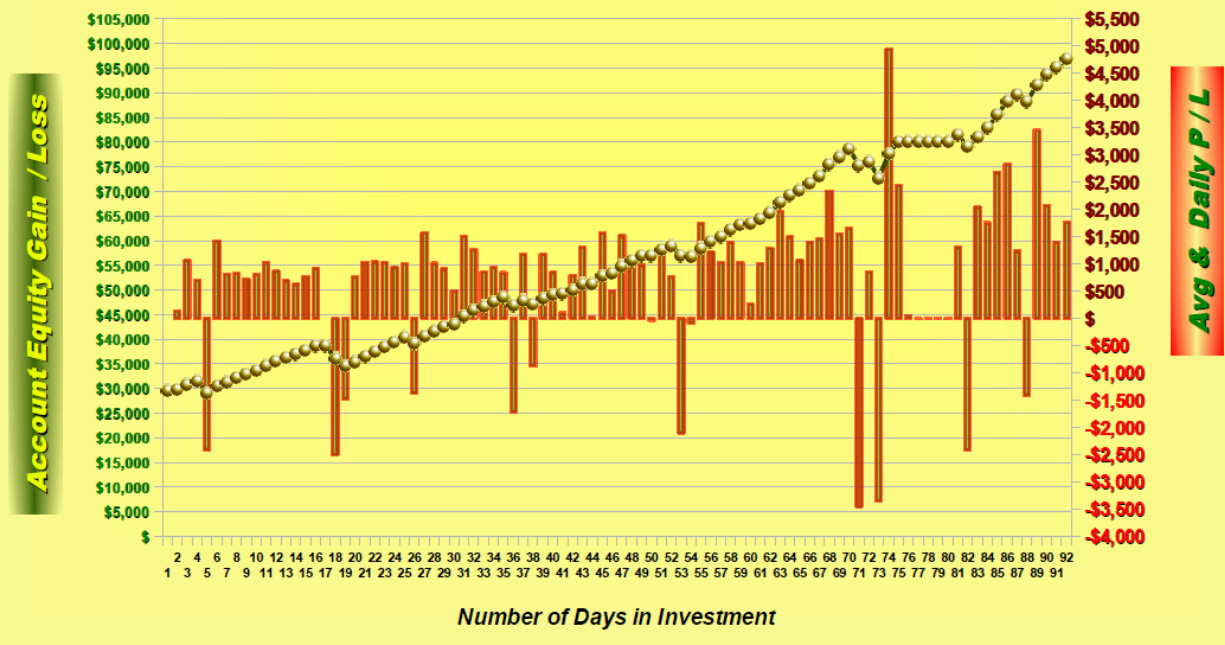

Current Long-Term Track Record Results – started on May 22, 2013 and uses InterActive Brokers with the DOM to place Limit Order trades as the IB simulator requires price penetration to fill a limit order. ([see attached LTTRR.pdf](#) and [IB\\_ReportManagement.Process\\_20130522-20130826.pdf](#) for full details)

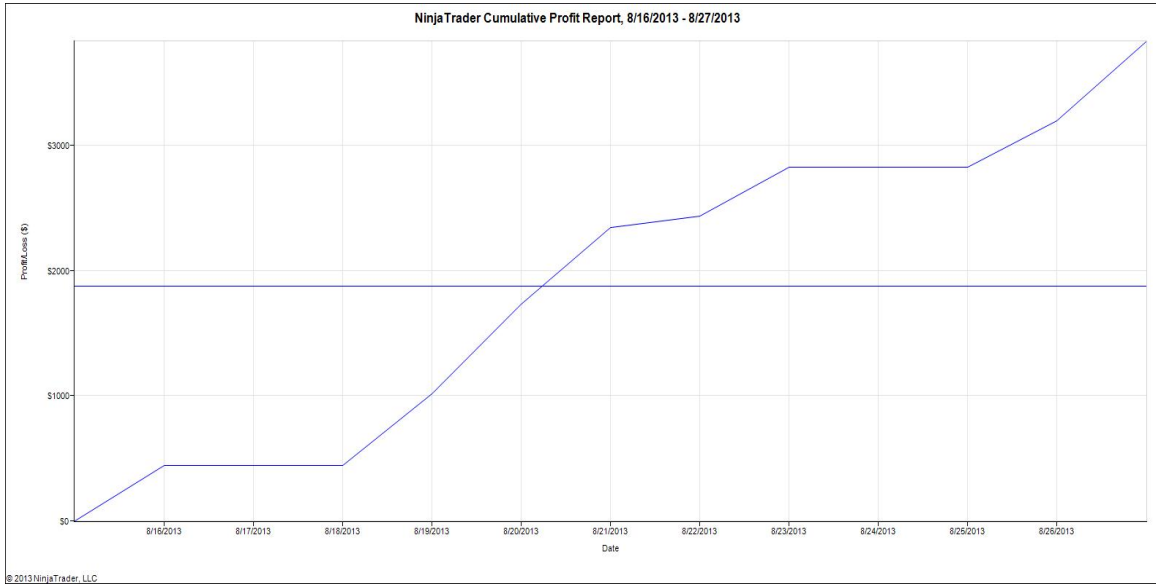

## Equity Curve of Track Record for Total Account

Start Date = May 22, 2013.....Beginning Account Value: \$29,558

■ Daily P / L    ● Equity Gain

Current **Short-Term Track Record Results** – started on Aug 16, 2013 and uses AMP Brokers/NinjaTrader with the DOM to place Limit Order trades as the NinjaTrader simulator requires an algorithmic price penetration to fill a limit order. ([see attached STTRR\\_20130816-20130827.pdf for full details](#))

**Strict use of Limit Orders:**
